

SATHISH M

Full Stack Developer | MERN Stack | Software Engineer

+91-7395858944 | sathishm8535@gmail.com | linkedin.com/in/m-sathish18 | github.com/sathishm8535-coder | Thoothukudi, Tamil Nadu

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience designing, building, and deploying production-grade web applications using the MERN Stack (MongoDB, Express.js, React.js, Node.js). Proficient in building secure RESTful APIs with end-to-end validation, error handling, and CRUD operations, as well as architecting real-time, event-driven systems using WebSockets (Socket.io). Skilled in TypeScript, Next.js (SSR/SSG), Redux Toolkit, Context API, and Tailwind CSS for scalable, responsive UIs. Experienced with CI/CD pipelines on Vercel and Render, JWT-based authentication, and API integration using Axios. Strong foundation in data structures, algorithms, system design principles, and agile engineering practices. Seeking a Software Engineer or Full Stack Developer role at a product-based company to deliver high-impact, user-centric engineering at scale.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Frontend: React.js, Next.js (SSR/SSG), Redux Toolkit, Context API, Tailwind CSS, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, RESTful API Design, CRUD Operations, WebSockets (Socket.io), Middleware Architecture, Input Validation, Error Handling

Databases: MongoDB (Mongoose ODM, NoSQL), Firebase Firestore (Real-time DB), IBM Db2 (SQL, Relational)

DevOps & Tools: Git, GitHub, Vercel (CI/CD), Render, VS Code, npm, Environment Configuration, Debugging

Auth & Integrations: Firebase Authentication, JWT (JSON Web Token), Google Sheets API, Axios, Fetch API, EmailJS, API Integration

CS Fundamentals: Data Structures & Algorithms, OOP, System Design (Basics), Agile / Scrum, Code Review, Performance Optimization

PROJECTS

SAC Net Exam – Online Examination Portal

Tech Stack: *React.js | Next.js | TypeScript | Node.js | Express.js | MongoDB | REST API | Tailwind CSS | Vercel*

- Developed and deployed a production-grade online examination portal for Sadakathullah Appa College, digitizing the complete exam lifecycle — registration, scheduling, and result delivery — for 1,000+ users.
- Built a multi-step, type-safe registration and exam workflow using React.js and TypeScript, implementing real-time client-side and server-side input validation to eliminate invalid form submissions.
- Implemented 10+ RESTful API endpoints in Node.js/Express.js covering user registration, exam CRUD operations, and result management, with layered error handling and input sanitization.
- Designed a fully responsive, component-based UI with Tailwind CSS achieving 100% responsive layout across mobile, tablet, and desktop viewports.
- Configured a CI/CD pipeline on Vercel with automated builds triggered on every GitHub push, reducing deployment cycle time to under 2 minutes.

IPL Auction Multiplayer Game – Real-Time Bidding Platform

Tech Stack: *Node.js | Express.js | Socket.io | JavaScript | HTML5 | CSS3 | Vercel*

- Developed a low-latency, real-time multiplayer bidding platform using Node.js, Express.js, and WebSockets (Socket.io), supporting concurrent bidding sessions with sub-100ms event propagation.
- Implemented a dynamic room-management system with unique session IDs per auction, handling concurrent player lifecycle events (join, leave, disconnect) with zero state corruption.
- Built conflict-free game state synchronization managing bidding turns, auction-lock logic, and duplicate-player prevention, ensuring data consistency across all active WebSocket clients.
- Architected an extensible Express.js backend capable of broadcasting real-time events to multiple simultaneous auction rooms without performance degradation.
- Deployed the full-stack application on Vercel with structured Git branching and clean commit history for maintainable version control.

Sadak Sports Register Portal – Institutional Event Platform

Tech Stack: *React.js | Next.js | TypeScript | Tailwind CSS | Node.js | REST API | Vercel*

- Delivered a full-stack sports event registration platform serving 1,000+ students and staff at Sadakathullah Appa College, replacing a fully manual process with an end-to-end digitized workflow.
- Built dynamic multi-event selection with multi-step form validation using React.js and TypeScript, eliminating duplicate registrations and reducing manual data entry errors to zero.
- Developed a reusable, modular component library with Tailwind CSS enforcing consistent design tokens, spacing, and responsive breakpoints across the entire application.
- Integrated a RESTful API layer with Node.js for event listing management, registration ingestion, and server-side validation, decoupling frontend logic from data persistence.
- Deployed on Vercel with automated CI/CD and maintained a structured Git workflow with feature branches and pull-request reviews.

Personal Portfolio Website

Tech Stack: *HTML5 | CSS3 | Vanilla JavaScript (ES6+) | Responsive Web Design | Vercel*

- Developed a performance-optimized, fully responsive portfolio with 5+ structured sections using semantic HTML5 and CSS3, achieving fast load times with zero framework overhead.
- Implemented interactive UI features including dark/light theme toggle with localStorage persistence, dynamic sticky navigation, and smooth-scroll UX to improve engagement and accessibility.
- Achieved cross-browser compatibility across Chrome, Firefox, Safari, and Edge using mobile-first CSS design principles and responsive layout techniques.

GitHub: github.com/sathishm8535-coder | **Live:** sathish-portfolio-seven.vercel.app

MSC Paint Service – Corporate Business Website

Tech Stack: *HTML5 | CSS3 | JavaScript | Responsive Design | Vercel*

- Built a professional multi-section corporate website (Home, Services, About, Contact) with interactive call-to-action elements and animated navigation, enhancing customer engagement and brand visibility.
- Optimized CSS architecture by eliminating redundant rules and applying adaptive layout techniques, reducing stylesheet size and ensuring consistent cross-browser rendering.
- Deployed production build on Vercel with GitHub version control; maintained zero downtime since initial deployment.

INTERNSHIP

Frontend Developer Intern – VSoft Solutions, Tirunelveli, Tamil Nadu

- Contributed to production-environment UI development by building and optimizing responsive React.js components consumed by end users, gaining direct exposure to professional software development workflows.
- Developed reusable, state-driven interface components using React.js, JavaScript (ES6+), HTML5, and CSS3, following component-based architecture patterns used in industry-grade codebases.
- Integrated RESTful APIs into frontend components using Axios, handling asynchronous data flows, error boundaries, and client-server communication in a live product environment.
- Collaborated within an Agile team environment, participating in code reviews, sprint planning, and iterative delivery cycles to meet product deadlines.
- Debugged UI issues across multiple browsers and devices, ensuring consistent performance optimization and responsive rendering across all screen sizes.

EDUCATION

B.Sc. Information Technology – Sadakathullah Appa College, Tamil Nadu | 2023 – 2026 (Expected) | SGPA: 7.69

Higher Secondary Certificate (HSC) – LK Higher Secondary School, Kayalpatinam | 2023 | 62%

ACHIEVEMENTS & ACTIVITIES

- Independently designed, built, and deployed 5+ production-grade full-stack and frontend web applications, demonstrating complete software development lifecycle ownership from architecture to CI/CD.
- Elected Student Representative (2024–2025), Sadakathullah Appa College — led cross-functional coordination of academic, technical, and cultural events for the IT department.
- Consistent GitHub contributor across all projects, maintaining structured branching strategies, atomic commits, and clean version control history reflecting professional engineering standards.
